

Philipp Thomas Wollmann, Zu einigen *litterae clausae* der apostolischen Pönitentiarie

Abstract: On some *litterae clausae* of the Apostolic Penitentiary

Now that the Repertorium Poenitentiariae Germanicum is complete, research on the medieval Apostolic Penitentiary has entered a new era. Before now, however, very few original charters of the Apostolic Penitentiary from the archives *in partibus* were known, and no archivally preserved letters close had been described. This paper treats four examples taken from Austrian and Bavarian archives of these *litterae clausae* issued by the Apostolic Penitentiary, analysing their formal features and comparing them to papal letters close.
